

Welcome to the Spring Carp Fever Newsletter. It has been a long winter with most of our Lakes frozen for a few weeks at a time. Which I have not seen for quite a number of years. Well at least the new season is upon us and the weather is getting warmer by the week.

With that there are many new products that are sure to make life easier on the bank and baits that will bag loads of Carp.

We are now currently stocking Vision Baits, a few of their products which have caught my attention are the Ecto Plasm, Tuna Pellets, Tuna Stick Mixes and The Carp Candy range.

The new Dynamite ranges of Boilies, Pellets, Pop ups and Liquid attractants are now gracing their presence on our shelves. Everyone is raving and going mad for the following flavours - Chocolate Malt + Tiger nut, Red Fish and Spicy Tuna with Sweet Chilli.

On the Korda front all their new gadgets are expected to be with us around mid April. This will include the Crusher tool and the Tungsten Sinkers. These products are sure to be mega fast sellers so if you require any of these, place your orders now so we can reserve them for you.

By popular demand we now stock Quest Baits

your mission - our passion

Wishing you all the best for the season ahead.

All the lads at "Team Carp Fever".

Note from Shaun Harrison
(Quest Baits)

Being Rolled NOW!

Remember the NEW 'Surf 'N' Turf is being released at the beginning of March. Orders are stacking up at a very pleasing rate so if you want to be one of the first to get your hands on this incredible bait make sure to place your order early and join the queue.

The weather has been really against us carp anglers this winter with more frozen lakes than I

can remember for a long while but there is no need for it to stop you going fishing. I have caught fish from under the ice from a number of lakes now but this year decided to spend a little time on the river instead. Most people live close to a river and there are hardly any in this country which don't contain carp. If you are desperate to wet a line try down your local river.

Well, that's it for this month. The nights are getting shorter, and in my experience the carp tend to feed regardless of the weather conditions once the longer daylight hours are with us – all we need now is ice free lakes. Best of luck and may I wish you as always.

Best fishes
